Gen. Gouraud's army in its offensive in the Champagne captured Somme-Py.

Probably a wrecked newspaper office where the staff had had some champagne—hence they got Somme-Py.

"Canadians gain key to Cambrai at Bourlon Wood," says a news heading.

And Johnny Canuck of course unlocked the door and went in front way and the Huns skidded out at the back on a double trot

German claim that they withdrew at certain places.

No one will dispute that claim when it is considered that there are five separate Allied armies on the western front pushing the Huns back on the run.

Gen. Von Payer, German vice-chancellor, has been kicked out by the Kaiser.

He didn't Payer-nough heed to the Kaiser's bunkum.

"Hindenburg line is smashed again by Haig, on a front of eight miles and a depth of two miles," is Tuesday's news.

Hindenburg's line is being so badly smashed up, that he himself won't know his kid

The French have taken over 12,000 prisoners on the front between the Argonne and the Soupe, since Sept. 26th.

That means that over 12,000 Huns Argonne into Soup-pe—or canned.

Ferdinand of Bulgaria was no doubt thinking more of his own finish when he agreed to peace advances.

Probably the king decided that a B(F)erd-in-and was worth two in the bush.

Dr. W. S. Wolf is to be the successor to Count Von Hertling the retiring German imperial chancellor.

If there is anything in a name the new imperial chancellor will fill the bill for the Kaiser Bill

"Separate peace with Turkey is not improbable," says a news heading.

Most of us hope to get a separate piece of turkey on Oct. 14th

Huns admit defeat in Flanders section.

Very soon the Huns will have no Flanders section to withdraw from.

M. D. of Sounding Creek

Minutes meeting held in Youngstown, Sept. 28th.

Present:—Councillors Anderson, Clapperton, Cameron, Fraser and Proctor.

Minutes of previous meeting confirmed.

Correspondence read.

That Councillors Cameron and Anderson be committee to check the signatures to petition from ratepayers of tp. 31-8-4 re herd exemption, to ascertain whether the necessary two-thirds have signed.

Anderson, that C. A. Nelson be appointed auditor for the current year at a salary of \$75.00 Fraser, that all moneys spent in 1918, and henceforth, for the purchase of road diversions be in each case charged against the particular division in which the diversion is situated.

Anderson, that whereas, Wm Vennard is willing to withdraw his claim for damages, on that condition the council recommend to Mr. Farrow that the drain on the n.w. 15-30-7 be closed.

Anderson, that whereas, certain parties have been using the road allowances of the municipality as a dumping ground for rubbish, contrary to section 9 of by-law 8, that notices be inserted in the Chinook and Youngstown papers, offering a reward for information leading to the conviction of offenders under this by-law.

Fraser, that the petition of over two-thirds of the resident ratepayers of tp. 31-8-4, that they be exempt from the provisions of the herd law from Oct. 7th to Oct. 31st, be approved.

Adjourned to Nov. 9th.

Soldiers are to be given the privilege of abandoning their pre-emption on homestead land and taking up the same land on soldier entry, according to instructions that have been received from Ottawa. Money that has been paid on pre-emptions may be refunded, both principal and interest, and the soldier may then begin on a new basis, taking the land by virtue of his rights under the soldier land settlement.

A Small Every New Machine

Building that Puts Money in Your Pocket every year

you bought this year costs nearly or quite double what the same machine cost you three years ago.

Repairs for old machines are equally as high.

These new high costs cut into your profits no matter what you get for your products.

And a good deal of that high cost can be avoided. Your machines can be made to last and do good work for 3 to 5 years longer

A Simple Shed for Storage

A few pounds of grease, also a quart or two of paint will save the cost of the shed in one year or two at the outside.

The shed will last for years, and put a nice bunch of money into your bank account each year

Build it now and begin this cost cutting and profit-making at once.

Plans free—low figures on material and quick service.

FLETCHER LUMBER CO., Limited

The Independent Lumbermen

J. B. MACLEAN, Manager, Chinook

We are not satisfied unless you are.

The Herd Law

It will be noticed that in the minutes of the Sounding Creek council, the petition of the ratepayers of township 31-8-4, asking to be exempt from the herd law from Oct. 7th to the 31st, was granted by the council.

It should be thoroughly understood, however, that the permission only affects the single township which put in a petition. The herd law is in full force and effect up to Nov. 1st as usual in the other eight townships in the municipality.

Low Hail Insurance Rate

Eight cents an acre, the lowest rate ever imposed for municipal hail insurance in Alberta, has been agreed upon as the rate to be levied on land in crop this year under the operation of the municipal hail insurance system of the province. The board is now meeting at Edmonton, and after going through all the reports and claims for losses has fixed its acre rate, which is additional to the flat rate provided by law, at five cents an acre.

The total losses for the year were found to amount to slightly over \$158,000, the lowest for any of the five years since the system has been organized. Last year's losses were \$467,897, and the acre rate was 35 cents. The flat rate of 5c per acre applies to all assessable land in the hail insurance district.

It is officially announced that by conservation Canada is now saving 200,000 barrels of flour a month, or 2,600,000 per year, which is equal to 12,000,000 bushels of wheat.

Spanish Influenza

As this dreaded disease has reached the west, the following symptoms may be of use:

The onset is sudden, and individuals may be attacked on the street or while at work. Symptoms: A sudden chill, headache, elevation of temperature, pains in various parts of the body, sore throat, herpes on lips and prostration. Followed in many cases by pneumonia.

It is important that affected individuals go home and to bed at once, and place themselves under a physician. They should remain in bed until all symptoms disappear. Special care should be exercised during convalescence to avoid the serious complication, pneumonia.

The disease is disseminated by the secretions of the nose, mouth and respiratory passages of both affected persons and carriers, and is transmitted by direct contact or by the use of articles of clothing, etc., which have been contaminated by fresh secretions.

The discharges of the patient should be thoroughly disinfected throughout the course of the disease, and after recovery the sick room should be thoroughly disinfected and aired. Generally prophylactic measures consist of avoidance of crowded places, theatres and public meetings, and an appreciation on the part of the public of the dangers of promiscuous coughing and spitting, especially on the streets, in street cars, theatres, school rooms

Turkey is putting out peace feelers and the Allied governments are expecting an official move in that direction from The Porte at any moment.

Acknowledgments to Luke Fildes

To every home there comes a time when every thought, every hope, every prayer for the future centres on the recovery of one loved one. In that hour of anguish, every means to recovery is sought—the highest medical skill, trained nurses, costly treatment. Does the price matter?

* * * *

It may be so great as to stagger the imagination—a sum beyond the possible.

But does anyone ask, "Can we do it?"

Money or no money, they do it. And somehow they pay.

It may mean doing without things they think they need. It may mean privations, sacrifices, hardships. They make unbelievable savings, they achieve the impossible, but they get the money to pay.

* * * *

To-day in this critical period of our nationhood, there is imperative need for MONEY—vast sums of money.

Only one way now remains to obtain it.

The nation must save, every community, every family, every individual Canadian must save.

If anyone says "I cannot save" let him consider to what extent he would pinch himself to relieve the sufferings of a loved one at home; and surely he would not pinch less for our fighting brothers in France.

Without suffering actual privations, nearly every family in Canada can reduce its standard of living, can practice reasonable thrift, can make cheerful sacrifice to enrich the life-blood of the nation.

You who read this, get out pencil and paper NOW. Set down the items of your living expense. Surely you will find some items there you can do without.

Determine to do without them.

Start TO-DAY. Save your money so that you may be in a position to lend it to your country in its time of need.

Published under the Authority of
The Minister of Finance
of Canada.

Thrifting, Are You?

We think we are thrifting,
But maybe we're drifting,
And the coin that we clink is not saving but shifting,
But seemingly spending
Goes on without ending
And heedless still is the tend of our trending.

In gleaming my meaning,
You'll find gasolining
Is still used for dusting instead of for cleaning;
And most of us batten
On fine fare and fatten,
While robing our softness in purple and satin.

Oh, maybe you're guilty and maybe you're not,
But ask: "Have I thrifted as much as I ought?"

Our thrifting is fickle,
It runs in a trickle,
We pickle a nickel to give us a tickle,
Than ride on the trolleys
To go to the the Follies
And hand ourselves thanks and a couple of jollies.

Man still goes on puffing,
Imbibing, and stuffing,
And hold enough yet without "Hold! enough!"-ing,
While woman still poses
And shows us hoses.

At the end of the day, if you're feeling too good,
Ask this: "Have I thrifted as much as should?"

FARM LANDS

United Grain Growers Securities Co.

owned and controlled by United Grain Growers, Ltd., doing a straight Commission.
Connection with buyers in Eastern Canada and the United States.

SYNOPSIS OF CANADIAN NORTH-WEST LAND REGULATIONS

THE sole head of a family, or any male over 18 years old, may homestead a quarter section of available Dominion land in Manitoba, Saskatchewan or Alberta. Applicant must appear in person at the Dominion Lands Agency or Sub-Agency for the district. Entry by proxy may be made at any Dominion Land Agency (but not Sub-Agency), on certain conditions.
Duties—Six months' residence upon and cultivation of the land in each of three years. A homesteader may live within nine miles of his homestead on a farm of at least 80 acres, on certain conditions. A habitable house is required, except where residence is performed in the vicinity.
In certain districts a homesteader in good standing may pre-empt a quarter section alongside his homestead. Price \$3.00 per acre.
Duties—Six months' residence in each of six years after earning homestead patent; also 30 acres extra cultivation. Pre-emption patent may be obtained as soon as homestead patent, on certain conditions.
A settler who has exhausted his homestead right may take a purchased homestead in certain districts. Price \$3.00 per acre. Duties—Must reside six months in each of three years, cultivate 30 acres and erect a house worth \$2000.
The area of cultivation is subject to reduction in case of rough, scrubby or stony land. Live stock may be substituted for cultivation under certain conditions.

HUNS ARE ADEPT IN PREPARING HORRORS FOR THE HEEL OF WAR

INVENTED POISON GAS ABOUT EIGHT YEARS AGO

That the Germans Long Since Had in Mind the Barbarous Plan of Making Use of Poisonous Gas to Overcome Their Enemies Is Well Established

That the Huns long ago had in mind the barbarous idea of using poison gas to overcome their enemies is a well established fact, confirmed by their own testimony. The first application of the use of such agents was in the design of a gun to protect them, patented by the Krupp factory in 1910. A London illustrated paper of August 10, 1901, gave figures of the gun fitted for poison work and mounted for use in the field and a fanciful illustration of the piece in action, firing from a slight elevation upon a body of Oriental troops who are writhing in agony under the strange attack.

Thus, eight years ago, in the quiet old days that now seem like ancient history, the Huns were already boasting of their poison gas and preparing to superimpose a new horror upon the hell of war. The general public in London at the time, however, noted it as a theoretical possibility of artillery, academic in interest, somewhat like the Chinese "stink-pots," never dreaming that the use was contemplated in actual warfare against civilized nations, but thinking of it only as a means of attacking the enemy.

He was a deserter from the German lines who escaped to the British side of the Ypres salient about the end of May, 1918, and he said that the Huns were preparing to poison the British by wholesale with gas and that they had cylinders fixed to the front of their tanks, and that they projected the deadly vapors. One believed him and the men were ordered to be on guard against the heavy casualties.

Several other assaults of less moment closely followed, but from the end of May, 1918, to December of that year there were no gas attacks for some unexplained reason—a fact which one does not reason with a rattlesnake.

The allies learned that the Germans had been training a special force, especially trained to conduct gas attacks, have their own engineers, meteorologists and chemists. They found that the Huns used long cylinders such as are used for oxygen or hydrogen. These cylinders were placed in the trench close to the front of the trench close to the forward side and the covered with a moss covering soaked with a solution of potassium to take up any gas leakage and sandbags to protect them from shrapnel. Each cylinder is connected with a lead pipe bent over the top. The gas which is highly compressed form, rushes out.

The success of a cloud attack like that at Ypres depends largely on the wind. If the latter is very high the gas is dissipated before it can reach the enemy or, if it is too low, the gas mixes with so much air that by the time it has reached the foe its effect is very greatly reduced.

Within a few moments, added Mr. Godfrey Isaacs, of the British admiralty board, tells the following story of the Huns' wireless operator, popularly known as Sparks: "A ship was some 140 miles from the coast when a submarine was sighted at a distance of about four miles and commenced shelling the ship. This continued for about an hour, during which period the operator remained in his cabin and got into communication with a land station from which he was getting information at once by a destroyer. During the hour the ship was being shelled the operator remained at his post, which would be much to give relief to the captain sent a message to the operator that having obtained promise of assistance it was advisable that he should leave his post, which was in a most exposed position, and take shelter. The operator replied that he was getting in touch with an American light cruiser, which was likely to give earlier assistance, and he would remain till he did so.

Within a few moments, added Mr. Isaacs, a ship passed directly through the cabin, decapitating the wireless operator. His headless body was found in the cabin with the completed message from the U.S. cruiser in front of him. Only the arrival of the vessel prevented the ship from being sunk.

Want Nut Shells and Fruit Stones The national salvage council of England states that all hard nut shells and fruit stones should be saved and taken to a central place for the government for a special war purpose, and it is suggested that in suitable areas, householders, companies and organizations should be organized, possibly with the help of children. Fruit stones should be dried in the sun or in an oven. Nut shells and fruit stones should be packed separately, preferably in sacks, and despatched to the nearest station, carriage forward, to the officers in charge of that department.

Go Berry Picking Often Fruit will be scarce this year and jam will be needed badly next winter. If you have a berry patch near your place, pick all you can, and can it for you can pick. Jam saves butter, and all sorts of things and use it for jam making.

Don't waste sugar at the fountain. Sugar for sweetening soft drinks and fountain drinks is sent to the bottom of the sea by submarines.

Substitutes for Wheat Flour A supply of substitute for wheat flour in Canada is being rapidly augmented. The Quaker Oats Company of Peterboro have installed a mill to produce corn flour, corn meal, oat flour and oatmeal, at the rate of 7,000 barrels a day. Two mills to produce 200 barrels of substitute flour per day are being installed in London and Penetang, respectively.

One beautiful morning in April, 1915, the British in front of Ypres, largely recruited from Indian troops, stood watching the clouds looking for a yellowish white cloud that was rolling toward them along the ground under a gentle wind from the German line. It reached the trenches and its immediate effect was tremendous. Men fell, convulsed with agony, as before a reaping machine. Within a few minutes the whole battlefield was covered with groaning, dying men. Those on the fringe of the cloud were temporarily disabled and taken prisoner. Those behind fled on seeing the devastation ahead. Six thousand dead were left on the ground and a big gap was torn in the British front. Fortunately for the latter the Germans themselves did not appreciate the tremendous effect of their attack. Canadians on the left rallied and closed the gap, charging through the remains of the gas cloud itself to do so. The Huns' opportunity to break through passed and another indecisive battle was fought, the result, sullied by the violation of Belgium and the burning of Louvain.

The British, nevertheless, had been warned of this attack, but considered its futility so incredible that the man who cautioned them was only laughed at. He was a deserter from the German lines who escaped to the British side of the Ypres salient about the end of May, 1918, and he said that the Huns were preparing to poison the British by wholesale with gas and that they had cylinders fixed to the front of their tanks, and that they projected the deadly vapors. One believed him and the men were ordered to be on guard against the heavy casualties.

Several other assaults of less moment closely followed, but from the end of May, 1918, to December of that year there were no gas attacks for some unexplained reason—a fact which one does not reason with a rattlesnake.

The allies learned that the Germans had been training a special force, especially trained to conduct gas attacks, have their own engineers, meteorologists and chemists. Within a few moments, added Mr. Isaacs, a ship passed directly through the cabin, decapitating the wireless operator. His headless body was found in the cabin with the completed message from the U.S. cruiser in front of him. Only the arrival of the vessel prevented the ship from being sunk.

The Lurking Danger

Sensations of a Helpless Onlooker as a Ship Is Sent to the Bottom

I had climbed to the rugged crest of the rocky headland overlooking the sea in the sun. All about me silence broken only by the slow "swish-swish" of the sea far below and by occasional mournful cries of great gulls, writes a British correspondent.

Peculiar over the edge of the cliff I could see the nests of cormorants on the rocks a hundred feet below and irregular rows of great birds perched like sentinels about the shore. Over the sea, dead calm and blue almost as the Mediterranean, there was a faint shimmer of heat haze, and as far as the eye could reach the great blue waters were unbroken save for the steamers, well out from land, both following the same course but some distance apart.

Here at last I had "not away from the war," I reflected, as I lazily watched the two steamers slowly passing. Here all was peace, and it was difficult to believe that out yonder the guns were still roaring and that millions of men were still engaged in slaughter.

The sudden, totally unexpected sound of a violent explosion brought me up with a jerk. The rocky cliffs behind me echoed the noise, and the gulls rose in clouds, wheeling and screaming in alarm.

From one of the steamers a great burst of smoke and steam had gone up, she had heeled over and was staggering drunkenly, and in a flash I realized that she had been torpedoed.

From the second vessel, some distance away, there came a sudden spurt of flame, followed quickly by the "boom" of a gun, then another flash, another report, another and another. She was zigzagging through the water now at top speed, but I could see the splashes in the sea as the shells from her guns struck the water.

She was zigzagging through the water now at top speed, but I could see the splashes in the sea as the shells from her guns struck the water. The vessel stopped zigzagging and sailed on steadily, holding to her course. My eyes came back to the ship which had been torpedoed—just in time to see the last of her, for she was sinking fast, and almost as I looked she tilted and disappeared.

I found myself seriously near the edge of the cliff, raging at my own helplessness, unexpected as the sight of flame, followed quickly by the "boom" of a gun, then another flash, another report, another and another. She was zigzagging through the water now at top speed, but I could see the splashes in the sea as the shells from her guns struck the water.

An Exciting Sea Battle

Story of a Submarine Attack on Two Vessels and the Result

Life aboard a merchant vessel is far more exciting now than in pre-war days. The following story tells of an encounter with a submarine.

When they first sighted the submarine it was just after three o'clock in the morning, and too dark to see much. The German opened fire, but the darkness was against him, and for the time being, the merchantman succeeded in eluding his off. They did not sight him again until 5:30 a.m., when he appeared astern of the steamer, and began to close her, firing from a heavy gun as he rapidly overhauled her.

The master manoeuvred his ship skillfully and reserved fire. The enemy being out of range. This was the state of affairs for the next ten minutes, and then, at 5:50 a.m., the order to open fire was given to the ship's gunners.

The first two rounds were missed, but the third found its mark. The fourth, fifth and sixth all missed, but the seventh, eighth and ninth all hit on the U-boat's starboard bow after which he disappeared. It was ten minutes before he came to the surface again, and then his bow was under water, and his after end stood up high in the air. The master then wrote up the particulars: "The enemy did not attack again and was in the same position when last observed."

The weather was fine, but equally with a moderate long swell and full visibility between the squalls, the hour being 11.20 a.m. The master explained: "All went well until the time stated, when, without anything being seen, a noise resembling a splash was observed slightly on the port bow. This turned out to be a shot from a submarine which was close to the ship."

Finding himself pursued by the enemy, the master hoisted the British ensign, and gave the order to fire. "We exchanged shots," he says. The submarine's firing was very accurate, and, regarding the signal, his elevation was not so good, the shots falling about a cable ahead of us.

The steamer's 15th round exploded close to the enemy's conning tower, causing a big red splash and saving the hour being 11.20 a.m. The master explained: "All went well until the time stated, when, without anything being seen, a noise resembling a splash was observed slightly on the port bow. This turned out to be a shot from a submarine which was close to the ship."

Finding himself pursued by the enemy, the master hoisted the British ensign, and gave the order to fire. "We exchanged shots," he says. The submarine's firing was very accurate, and, regarding the signal, his elevation was not so good, the shots falling about a cable ahead of us.

CANADA HAS A PROUD RECORD COVERING FOUR YEARS OF WAR

COVETED HONORS WON BY HER BRAVE HEROES

Dominion Has Furnished an Army of Over Four Hundred and Fifty Thousand, and Of These Forty-three Thousand Have Given Their Lives to the Cause of Freedom

Canada's achievements in the four years of the war are briefly reviewed in the following statement given out by the director of public information at Ottawa.

The Canada entered the war with a regular army of only 3,000 men. At the beginning of last month she had sent overseas not less than 390,000 men, and on the same date there were in this country about 60,000 men being trained for service in France. This makes a total army of over 450,000.

This is much less than the total enlistment of Canadians in this war, for many of those who volunteered for overseas service were discharged before leaving the country, as the strict medical examinations of that time revealed their physical defects.

The loss of 113,007 soldiers have appeared in the casualty lists as wounded or sick. Between 30,000 and 40,000 of these have returned to Canada to be sent to the front. The master explained: "All went well until the time stated, when, without anything being seen, a noise resembling a splash was observed slightly on the port bow. This turned out to be a shot from a submarine which was close to the ship."

Finding himself pursued by the enemy, the master hoisted the British ensign, and gave the order to fire. "We exchanged shots," he says. The submarine's firing was very accurate, and, regarding the signal, his elevation was not so good, the shots falling about a cable ahead of us.

The steamer's 15th round exploded close to the enemy's conning tower, causing a big red splash and saving the hour being 11.20 a.m. The master explained: "All went well until the time stated, when, without anything being seen, a noise resembling a splash was observed slightly on the port bow. This turned out to be a shot from a submarine which was close to the ship."

Finding himself pursued by the enemy, the master hoisted the British ensign, and gave the order to fire. "We exchanged shots," he says. The submarine's firing was very accurate, and, regarding the signal, his elevation was not so good, the shots falling about a cable ahead of us.

Chinook Breezes

Mr. O. Fenske of Craigville is
in town this week.

The post office building has
been much improved by two
coats of paint.

Mr. and Mrs. M. L. Chapman
and young daughter motored to
Davidson, Sask., on Sunday, to
be gone a week or so.

Ladies aid will meet at the
home of Mrs. Smith, Third Ave.
West, on Wednesday afternoon,
Oct. 9th.

A number of Americans living
in the Chinook district, who come
under the recent U.S. registra-
tion order, have registered at the
local office here.

Mr. C. R. Brownell is putting
up an addition 30x60 on the
north side of his garage. When
completed the building will be
60x60.

In the later casualty returns
we regret to notice the name of
Pte. C. L. Hogle of Cereal, has
been killed in action; and that
Pte. E. C. Ceser of Kimmund, was
gassed.

A convention of the teachers
of the Chinook and Hanna in-
spectors will be held in the
Chinook Consolidated public
school, on Thursday and Friday,
Oct. 17th and 18th.

A lantern lecture, entitled,
"The Great Retreat," will be
given in the Chinook church, on
Friday evening, Oct. 11th. A
collection will be taken up in aid
of the Red Cross.

Magistrate M. J. Hewitt, in
the action brought by Eli Jack-
son against the Youngstown vil-
lage council for wrongful dismis-
sal, has awarded Jackson \$50.00
and costs.

We regret to have to record
the sudden death of the six-
months-old daughter of Mr. and
Mrs. T. H. Bradford of Laughlin,
which occurred on Friday, Sept.
27th, after two days' illness. A
funeral service was conducted by
the Rev. Geo. Elliott, interment
in the Chinook cemetery on
Sunday, Sept. 29th. The parents
have the sympathy of a number
of friends and neighbors in their
sudden bereavement.

In sentencing Andrew Simon,
a farmer from the Chinook dis-
trict, on Wednesday, to two years
and three months in Lethbridge
jail, for shooting at Fred Ruther-
ford, a neighboring farmer, in
July last, Mr. Justice Simmons
said that if Simon was of good
behavior while in jail that he
would be glad to assist in getting
him out on parole. The defence
was that when the shooting took
place Simon was mentally un-
balanced from the effect of the
sun, and that he, had absolutely
no recollection afterwards of
what took place.

"Something must be done,"
says the German high command

For over four years Germany
has been trying to "do some-
thing," and have done nothing
beyond killing babies and women
and firing enemy towns.

"Turkey is the centre of in-
terest now," says a dispatch.

Yes, with Thanksgiving day
rapidly approaching, Turkey will
be the centre of attraction on the
dining table.

Influenza Warning

Keep feet and clothing dry
Avoid crowds.
Protect your mouth and
nose in presence of sneezers.
Gargle your throat three
times a day with a mild anti-
septic, if only salt and water.
Don't neglect a cold.
Keep as much as possible in
the sunshine.
Don't get "scared."

The Rev. F. E. and Mrs. Davey
came by train this morning from
Langdon, where they have been
the past few weeks, and left for
their home at Big Stone. Mr.
Davey intends to go to Minn. for
treatment for that rheumatiz.

MONEY TO LOAN

Osler, Hammond and Nanton,
general agents for
North of Scotland and other
Mortgage Companies
have \$30,000,000 invested in farm
loans in the West, the returns from
which they re-invest in the same way
They have lots of money now. Their
inspector, Mr. Sweeney, who was in
the district a few days ago, says
"They have barrels of money, and
that no good loan will be refused."
Let them renew the loan you have
on your homestead, and give you
more on your pre-emption, give
you money to prove it up if you wish.
Or let them give you a new loan, as
large, and probably longer, than you
can get elsewhere. The district needs
all the money we can get hold of in
this way. Pay up your indebtedness
to the bank, to the municipality, to
the school, and to others. We can
furnish the money. Loans for five
years, repayable in three years, with-
out extra charge. Interest at 8 per
cent.—nothing but the interest to pay
each year.
LOBBE PROUDFOOT,
Agent, Chinook
